Terceira Island

Land Activities

Hiking

A Lagoa da Fajazinha (Fajazinha Lagoon)

This trail crosses the Nature Network 2000, with large geological diversity and unique flora and fauna.

Lagoinha

On Serra de Santa Bárbara (Santa Barbara Mountain), this trail is part of the Nature Network 2000 and has one of the most captivating natural views of the island.

Dark Misteries

This circular walking trail begins and ends at Gruta do Natal, next to the Lagoa do Negro. On a worn dirt trail or through the woods, where rare and breathtaking vegetation is abundant, you can appreciate an idyllic view, and at the same time integrate yourself in the surroundings and experience the Mistérios (Mysteries), which resulted from an eruption in the XVIII century.

Crossing the Island

Discover Terceira Island through its interior walking trails. This is a profound and emotional discovery on trails where cars do not tread. Here, surrounded by the countryside, you can come to understand the balance and the power of Nature, which is our own power. In a place of incomparable beauty, let the silence and the sounds of Nature invade your being.
